☒ Permit Web Access

The system will create a temporary password for the driver. See the Driver's App Guide for details.

## Install Your Device

- 4 You will need your device, the cord, and the tablet. If you have ordered more than one tablet, you may choose any tablet that you have received, as these have not been paired yet. Begin with the ignition and the tablet powered off.
- 5 **J-BUS Devices:** Connect the cord to the device, then plug the device into the J-Bus port.
- 6 Turn on the ignition, and verify green and orange lights on the device.
- 7 Power on the tablet. The app will automatically start. The tablet will then recognize all devices within range. The device at the top of the list will be the one closest to you. Double check by matching the serial number, then choose the device.

**OBD Devices:** Connect the OBD extension cord to the device, then plug the device into the OBDII port.

- 8 Enter your Vehicle ID when prompted to complete eFleetSuite setup.
- 9 **OBD devices only** - A pop-up window will prompt you to input the current odometer reading of the vehicle.

**Your installation is complete!**

*Per regulation, for the first 10 days the system may not display available hours on the tablet. The system is still capturing information and generating logs, which are available in the eFleetSuite portal.*

# Get to Know the CommandGPS ELD System

Click HOS or DVIR for a description of each log, checklist, and report available.

Make your driver and date selections above, then click 'View Logs' to see Driver Logs.
